Happy Holidays

FROM HG&E

Your December bill reflects an extra 10% holiday discount* on gas and electric services, granted by the HG&E Commission.

Last month, Holyoke Gas & Electric's Commission approved an extra 10% prompt payment discount on energy services billed during the December cycle. This discount applies to commercial and residential gas and electric customers who are not already participating in an economic development discount program*.

"The holidays are a special time to reflect on what makes Holyoke such a strong community," said HG&E Commission Chairman Fran Hoey. "We hope this extra discount brings a bit of relief and cheer to our customers as we celebrate the season together."

For the average homeowner who heats with natural gas, the combined discounts (prompt payment and holiday discount) amount to savings of approximately \$80 on their bill. HG&E has implemented a holiday discount each year since 1992.

For customers who are looking to conserve energy and save money this winter, HG&E has a variety of resources that can assist customers who are facing financial hardship, including payment plans, energy efficiency programs, and connections to fuel assistance programs. For more information, visit hged.com/save or contact customer service by calling (413) 536-9300.

***This discount does not apply to customers who are receiving a discounted rate schedule and/or participating in an economic development incentive offer, including: First-Time Homebuyer program, the Economic Development Discount program, Cultivation program, Agricultural Rate customer, and Contract Rate customers, including Industrial and Interruptible. Bills must be paid by discount date to receive discounts.**

RATE COMPARISONS

LOWEST ELECTRIC RATE

November 2025: Residential customer consuming 500 kWh/month. Amounts shown include all discounts and use the fixed default generation supply price.

LOWEST NATURAL GAS RATE

November 2025: Residential customer consuming 103 CCF/month. Amounts shown include all discounts.

Homeownership Opportunity at South Holyoke Homes

The Holyoke Housing Authority is currently accepting applications to purchase an affordable home around Carlos Vega Park in South Holyoke. The 3-story duplex homes consist of 3- and 4-bedroom units with brand-new appliances, a private backyard and off-street parking. Applicants' household income must be below the stated limits, be first-time homebuyers, and have a mortgage pre-approval to submit with their application. Deed restrictions apply. To learn more or apply, please visit www.southholyokehomes.org.

Protect your family from Carbon Monoxide

Whether you heat your home with oil, natural gas, propane, coal or wood, your heating system can produce carbon monoxide (CO) if it is not working properly, or if it is inadequately vented. CO is also produced from internal combustion devices such as cars and small gasoline engines. Carbon monoxide is odorless, colorless and tasteless, but very toxic. Signs indicating the presence of carbon monoxide in the home include stuffy, stale or smelly air, very high humidity or soot coming from a fireplace or heating system.

What are the symptoms of Carbon Monoxide poisoning?

The symptoms of carbon monoxide poisoning are often confused with those of the flu, and the highest incidence of poisoning occurs during the flu season.

Symptoms include headaches, dizziness, nausea, unclear thinking, shortness of

breath, weakness, vision problems and loss of muscle control. High concentrations of carbon monoxide can lead to unconsciousness, brain damage or death. However, a victim may not experience ANY of these symptoms, or only one or a few symptoms. You should suspect the presence of carbon monoxide if symptoms tend to disappear when you leave your home.

What should you do if you suspect the presence of Carbon Monoxide in your home? Immediately take the following actions:

- ♦ Open the windows and doors.
- ♦ For an emergency inspection, contact a licensed heating contractor or HG&E (Natural Gas customers) at **(413) 536-9300**.
- ♦ If carbon monoxide is detected in your home, seek medical attention.
